

RODIN'S WORKS ON VIEW

APPOINTS STAFF OFFICERS

New National Guard Commander Names Army Man Adjutant.

General John F. O'Ryan, commanding the New York National Guard, announced yesterday that he had appointed Captain Roderic F. Walton, U. S. A. (retired), as his adjutant general and chief of staff. Captain Walton, who will have the rank of lieutenant colonel, succeeds Lieutenant Colonel George A. Wingate, who retired with General Charles F. Bow last Wednesday.

Lieutenant Colonel Walton, who has been on duty with the New York National Guard for several years, is a graduate of West Point, class of April, '88, being assigned at that time as a second Lieutenant in the 10th Infantry. He served in Cuba with the regiment, and after a tour of duty in the United States he was sent to the Phillipine Islands.

General O'Ryan has also announced the appointment of Captain Arthur F. Townsend, 1st Cavalry, as chief quartermaster. The latter entered the guard as private in the 11th Regiment in 1887 and joined Squadron A as a private in 1901. He duly promoted corporal, sergeant major and second lieutenant and was chosen captain in 1907.

Captain Cornelius Vanderbilt, who served as an aid to General Rose, has been asked to continue as aid to General O'Ryan, but no word has been received yet from him.

General O'Ryan has reappointed the following officers from the staff of General Rose: Lieutenant Colonel William H. Chaplin, inspector general; Lieutenant Colonel N. B. Thurston, chief ordnance officer; Lieutenant Colonel William W. Ladd, judge advocate, and Lieutenant Colonel William G. Le Boatiller, chief surgeon. Other appointments are still to be made.

WORK CONDITIONS BETTER

Sanitary Control Board Reports

Cloak Trade Improvement.

The Joint Board of Sanitary Control, which makes an inspection twice each year of all the shops devoted to the manufacture of cloaks, suits and skirts, has made public a report of the last investigation, made in March. A noticeable improvement in the sanitary condition of many shops is noted, and compared with the state in which things were found when the board was organized two years ago from among the manufacturers and those desirous of improving the environments in which many thousands of people toiled daily, conditions were found to be much healthier.

At the next meeting of the museum's board of directors resolutions upon Francis L. Drexel and work for the museum which will be passed in a meeting to be held on May 10, the artist, who lost his life on the Titanic.

"In his death," it says, "the museum, common with the whole art loving community, has met with a great loss."

WOULD SHOOT ANARCHISTS

Sheriff Harburger Assails Those Who Tore Down Flag May Day.

Sheriff Harburger last night vigorously attacked the anarchists who on May Day trampled on the American flag. He said the men guilty of this outrage should have been shot on the spot and that there was no room in this country for such persons.

The Sheriff favored deporting them. Mr. Harburger made his speech at a meeting of the Cosmopolitan Lodge of the Knights of Pythias at Terrace Garden, after which there was a dinner in his honor. He said in part:

"They should have been arrested and an example made of them, and while I am chief peace officer of this county all my deputies and special deputy sheriffs will be called in to help us to find out who these flagrant disturbers of the peace and violators of law and order. The principles of the old War Governor, John A. Dix, ought to be applicable, that if any man dares to do an American flag he should be shot on the spot."

It is also said that 2 per cent of the ships have no drop ladders on the fire escapes. Compared with 15 per cent, the figure last year, the advance made is encouraging to the board. At present 49 per cent of the doors still open in against 37 per cent last year.

The number of persons employed in certified shops is now said to be 25,356, or about 51 per cent of the total number of the workers in the trade.

"THE FLY FIGHTER" OUT

Mr. Hatch's Committee Tells How to Kill House Pests.

The American Civic Association's Fly Fighting Committee has been a busy lot in the last six months in the hope of ascertaining the best means of making homes and neighborhoods flyless. Edward Hatch, Jr., chairman of the committee, has spared neither expense nor time in obtaining a formula that would eventually eliminate a pest.

Within the last few months hundreds of letters seeking information have been received by the committee, and in order to relieve the committee's clerical force of making individual answers to the great number of letters, Mr. Hatch announced yesterday that he had just issued "The Fly Fighter," a four-page tract in newspaper form, the official organ of the anti-fly movement.

"Four years ago," says Mr. Hatch, "when we began this campaign, it was hard to push, because the disease-bearing habits of the house fly were little understood, and the facts, even when comprehended, were thought too disagreeable for discussion, but now the campaign is pushing itself and us to supply the demand for ammunition."

The most approved fly poison seems to be formalin mixed in the proportions of one ounce to sixteen ounces of equal parts of milk and water. Fly larvae may be killed in the manure, in which they chiefly breed, by use of high calcium lime or iron sulphate without serious loss of the fertilizer quality of the manure so treated.

The greatest stress is laid upon cleanliness of stables and backyards, as depriving flies of their favorite breeding places.
